

Miniaturized Raman

spectrometers and microscopes

Yaroslav Aulin, PhD
Scientist

About Lightnovo ApS

Founded 2019

Lightnovo's Mission

Democratize the power of high-end Raman spectroscopy for the benefit of mankind.

 Located in Birkerød, Denmark,

Products Overview **miniRaman**

Spectrometer and microscope

Compact, high performance for mass market

miniRaman
spectrometer

miniRaman
microscope

Precise
Focusing stage

Products Overview **RG Raman**

Spectrometer and microscope

R&D performance/price leader

RG Raman
microscope

RG Raman
spectrometer

Products Overview THOR

Advanced R&D Raman microscope

Overall Raman performance leader

The basics of Raman technology

Raman Spectroscopy

**Probing of sample
with laser**

Solid, powder, liquid
probing through container

**Signal
generation**

Signal collected by analyzer
transmitted wirelessly

**Signal
analysis**

Spectrum is the "fingerprint" of the
sample substance
(on smartphone, tablet or PC)

Miniaturization **without** **quality compromise**

Miniaturization and cost reduction has enabled high-quality cameras to become a broadly available consumer product manufactured in the billions of units.

High-quality cameras

- Sales DSLR + mirrorless
- ~7M units in 2022

Smartphone camera

- Reduce size, cost
- Keep high performance
- Sales ~1.3B units in 2022

The Solution

miniRaman - Patented Technology

Overall Raman performance leader

Quick Start

Operation readiness - 5 seconds

Small Size

To be carried on belt - 100 x 40 x 30 mm

Price

From 10,000 €

Reliable

No need for calibration High ID power

W02019145005 - An apparatus for carrying out Raman spectroscopy

IP and unique benefits

Technology developed and patented in DTU

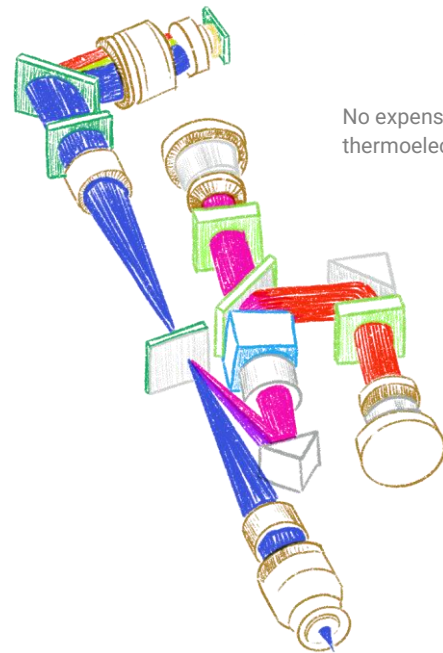

Dual-range spectrometer using two lasers:

785 nm ($400\dots2700\text{ cm}^{-1}$)

660 nm ($2700\dots4500\text{ cm}^{-1}$)

In-built reference channel
(polystyrene)

No expensive
thermoelectric cooling

Battery powered,
2 hours operation

W02019145005 - An apparatus for
carrying out Raman spectroscopy

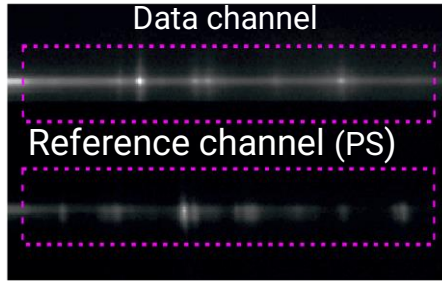

IP and unique benefits

1. High performance real-time XY calibration

Consumer-level
CMOS Sensor
2 μm pixel size

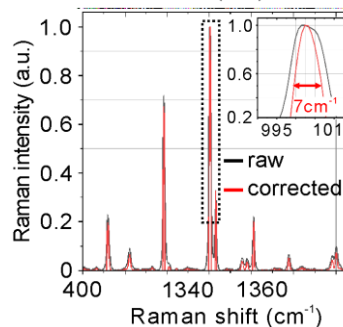

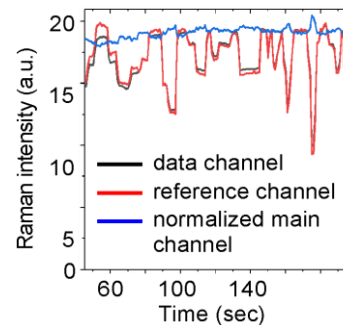

Confocal design (cross slit)

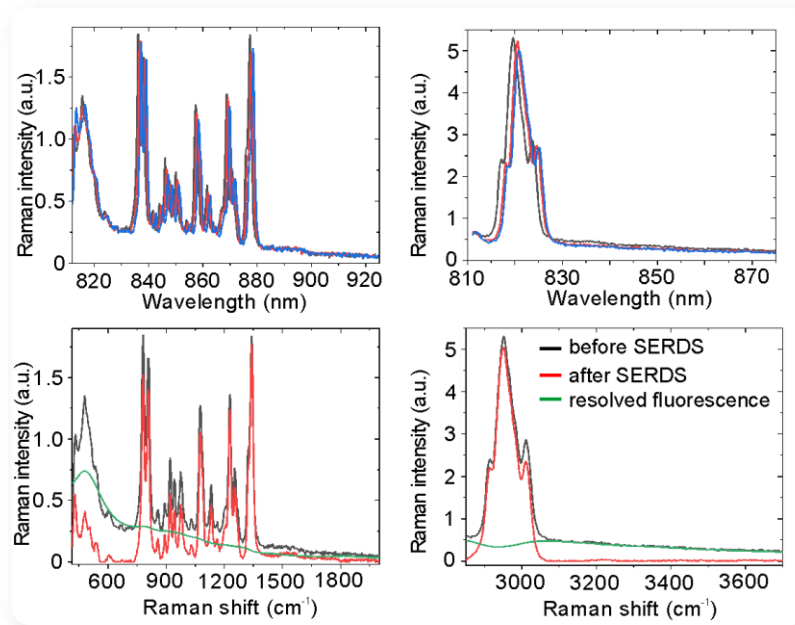

IP and unique benefits

1. High performance real-time XY calibration

IP and unique benefits

2. SERDS

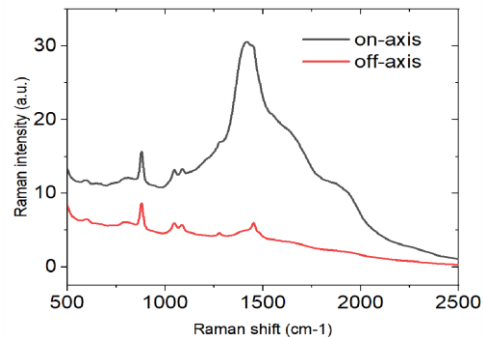

IP and unique benefits

4. Background suppression (SORS)

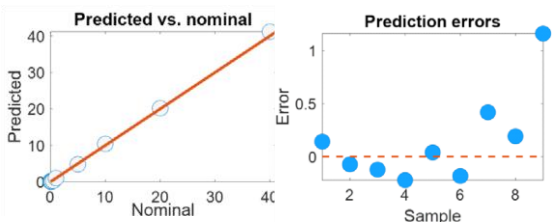

Horizontal row

IP and unique benefits

Sensitivity test. Quantification of methanol.

LoD: 0.07%
LoQ: 0.21%

Best in literature
LoD: 0.25%

miniRaman models

Spectral range: **2700 – 4000 cm^{-1} (660 nm)**
2550 – 4000 cm^{-1} (675 nm)
400 – 2700 cm^{-1} (785 nm)

MiniRaman Standard

One laser 785 nm, power on a sample 5-50 mW

MiniRaman Power

One laser 785 nm, power on a sample 10-90 mW

MiniRaman SERS

One laser 785 nm, power on a sample 0,5-15 mW

MiniRaman Standard Dual

Dual laser, power on a sample 5-50 mW (785 nm)
5-40 mW (660 nm)/ 5-75mW (675)

MiniRaman Power Dual

Dual laser, power on a sample 10-90 mW (785 nm)
5-40 mW (660 nm)/ 5-75mW (675)

miniRaman accessories

Precise Focusing Stage

Standoff accessory for **miniRaman**

miniRaman on a **drone**

miniRaman spectrometer

Use cases

miniRaman microscope

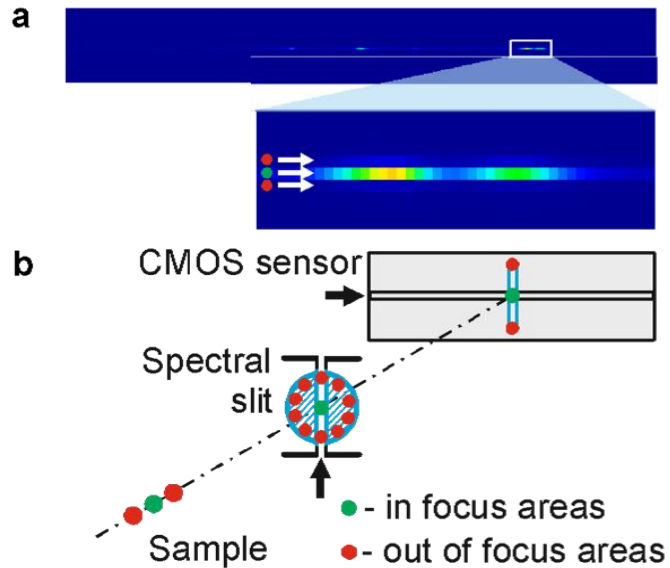

World smallest and most cost-effective confocal Raman microscope for academia and industrial R&D

- **Incorporates miniRaman analyzer unit (removable) as module**
- **Patent protected IP (W02019145005)**
- **Upright and inverted operation**
- **Ultra-compact (12x13cm, 9kg), low power, robust**
- **Built-in self-calibration and easy to use**

miniRaman microscope

World smallest and most cost-effective confocal Raman microscope for academia and industrial R&D

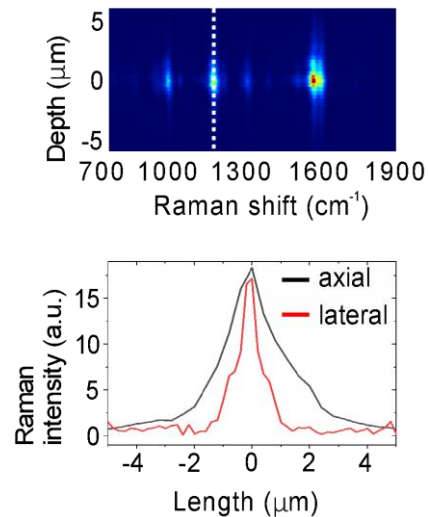

miniRaman microscope

Spatial resolution test

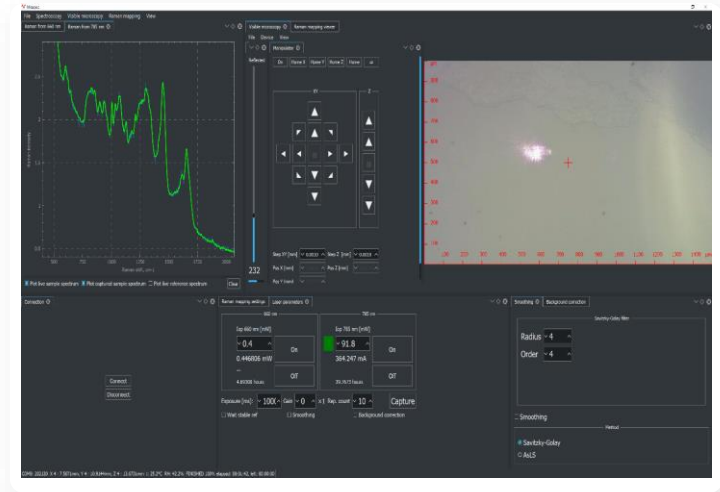

Polystyrene beads
at the size of 1 μm

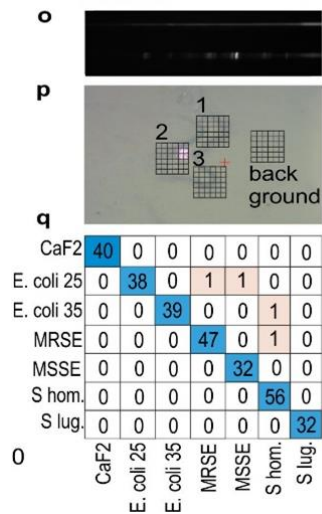

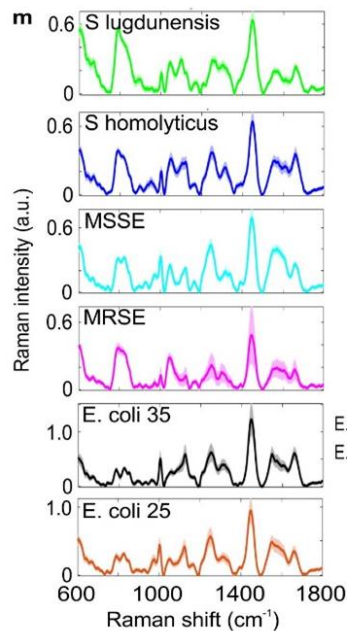

miniRaman microscope

In-vitro bacteria Identification

miniRaman microscope

In-vitro bacteria Identification

miniRaman microscope

Quantification of anti-cancer drug via SERS mapping

**We are open to
collaboration**
